

# NSSC 9CS LED HEADLIGHT

Exclusive customized LED Chips,  
higher power, higher lumens output

## ★ IMPORTED HIGH POWER LED CHIPS ★

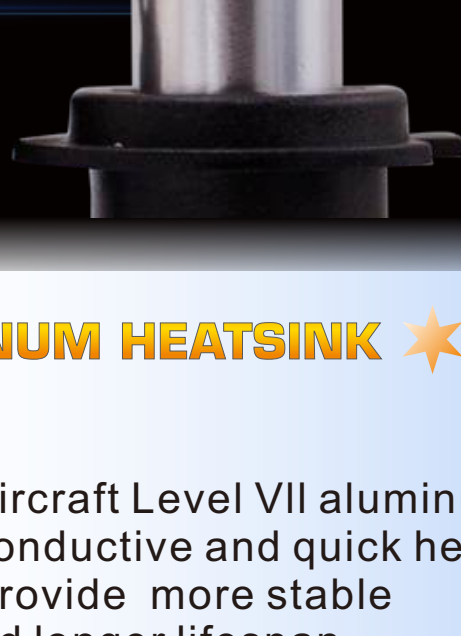

**5700K 165lm/W**

**Dependable & Powerful**

*Latest version exclusive customized LED chip*

Instantly activates to maximum brightness  
for safer driving

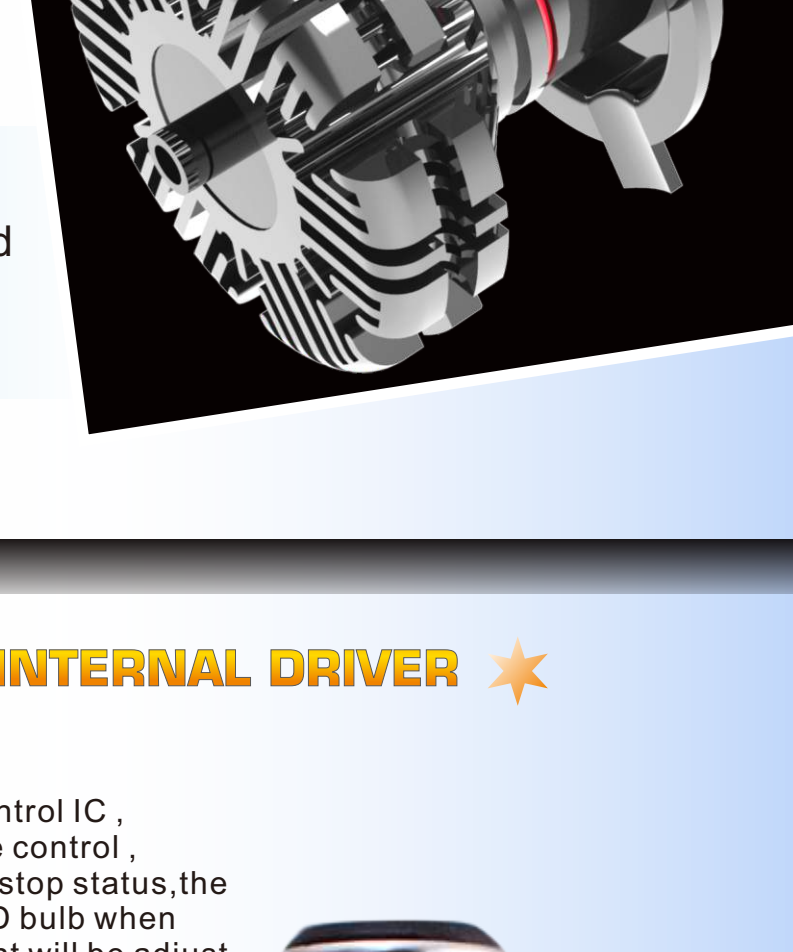

## ★ AIRCRAFT LEVEL VII ALUMINUM HEATSINK ★

High standard aircraft Level VII aluminum  
with high heat conductive and quick heat  
dissipation, to provide more stable  
performance and longer lifespan.

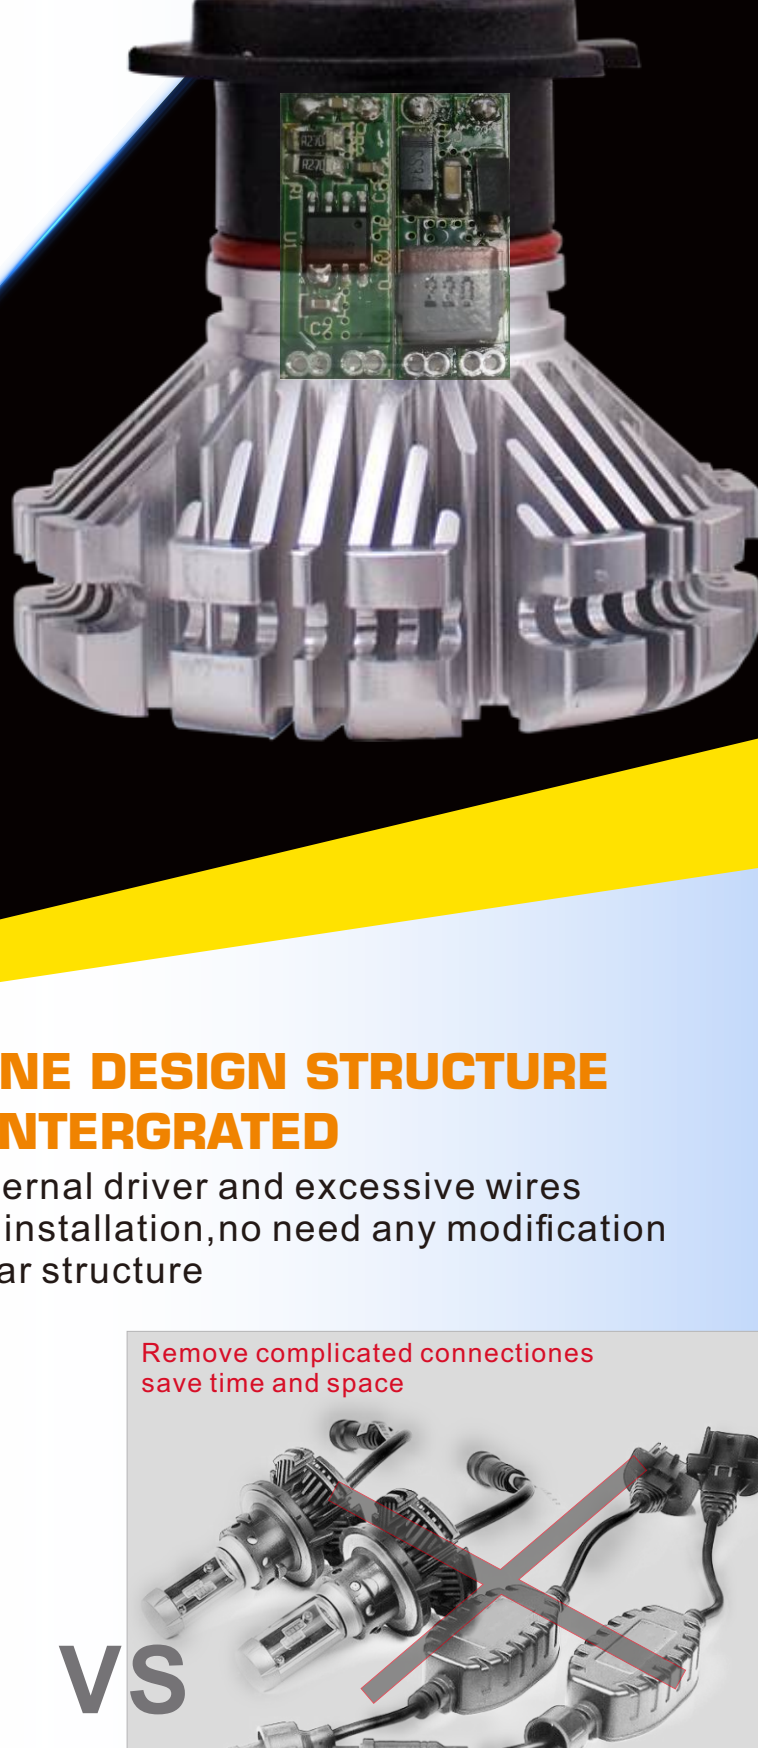

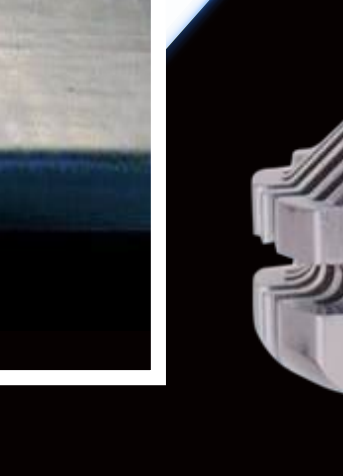

Aircraft Level VII  
aluminum heatsink

Perfect combination of  
professional heatsink design and  
dust cap which can help to save  
more space

## ★ INTELLIGENT INTERNAL DRIVER ★

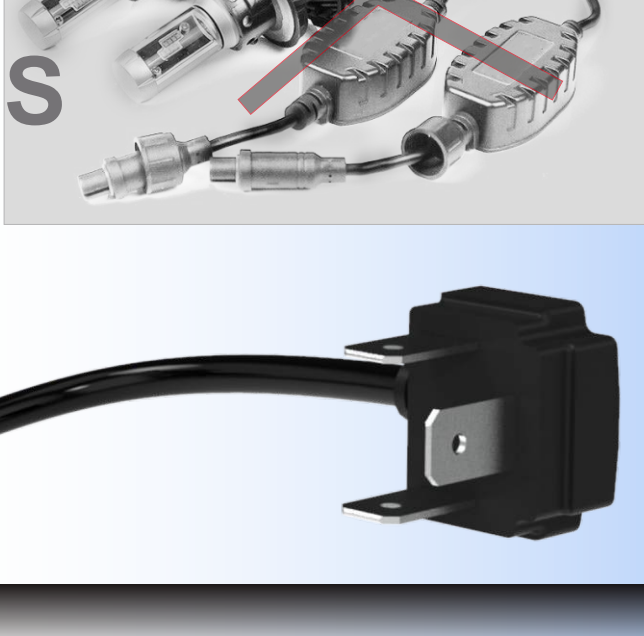

American MPS new design intelligent control IC,  
highly-integrated, intelligent temperature control,  
automatic identification of car moving or stop status, the  
current will be reduced to protect the LED bulb when  
car stopped and when driving, the current will be adjust  
automatically depend on the LED bulb heatsink working  
temperature to make sure safe driving.

## ALL IN ONE DESIGN STRUCTURE HIGHLY INTERGRATED

No need external driver and excessive wires  
Convenient installation, no need any modification  
of original car structure

Remove complicated connections  
save time and space

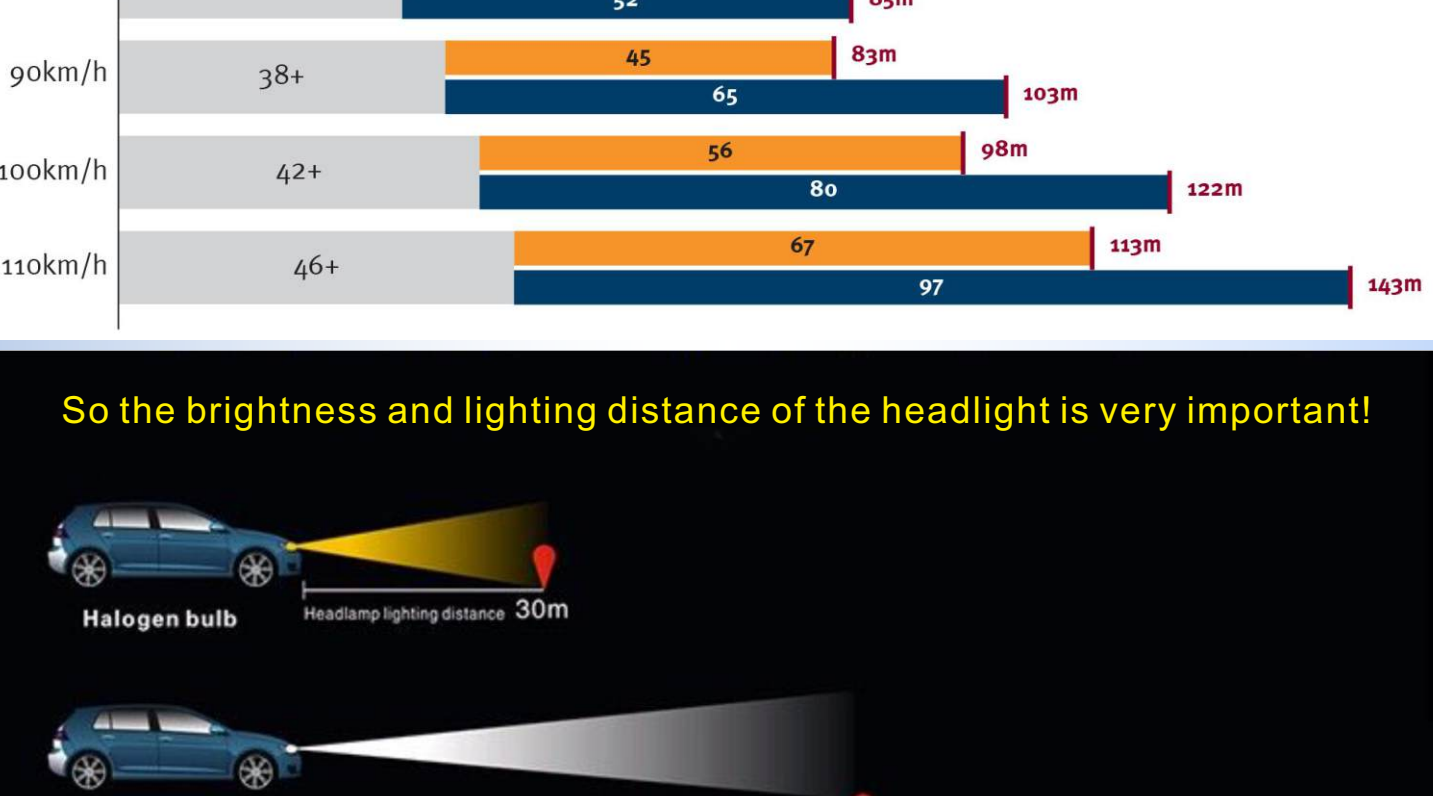

VS

## ★ LIGHTING PATTERN EFFECT ★

How long it takes to stop (driving an average family car)

So the brightness and lighting distance of the headlight is very important!

## ★ SUPER BRIGHT 6000LM ★

Excellent lighting pattern. Concentrated light.  
High brightness. Long lighting distance.

High brightness low beam, 3 times brighter than halogen bulb.

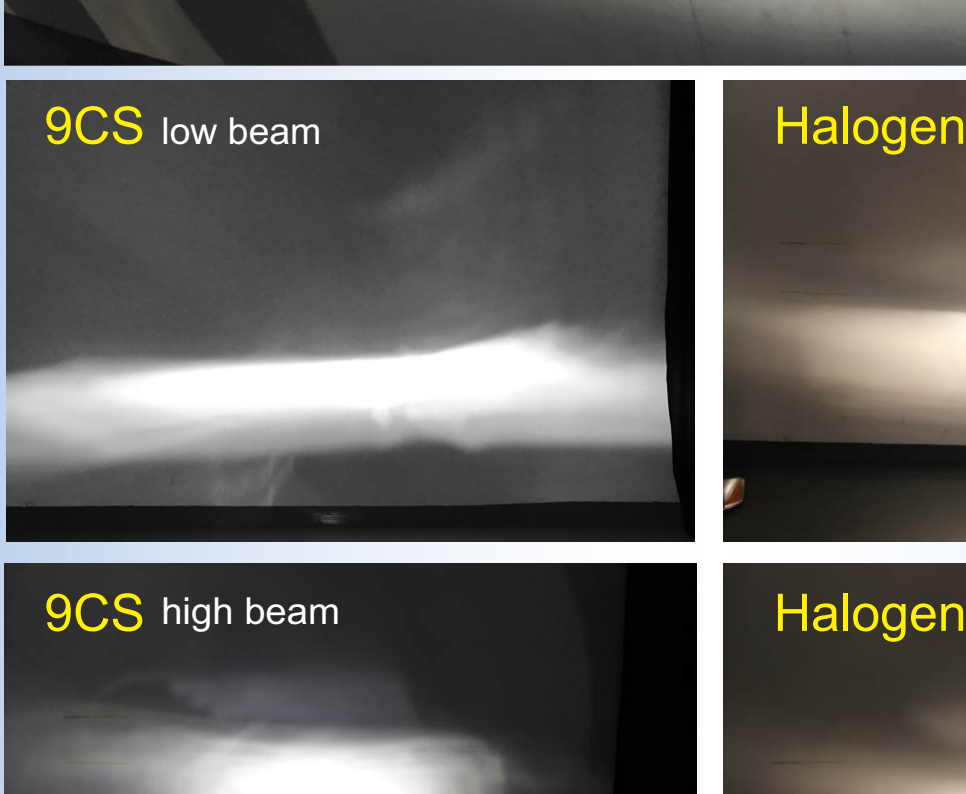

NSSC 9CS High beam lighting distance is beyond 200m.

The data speaks louder than words.

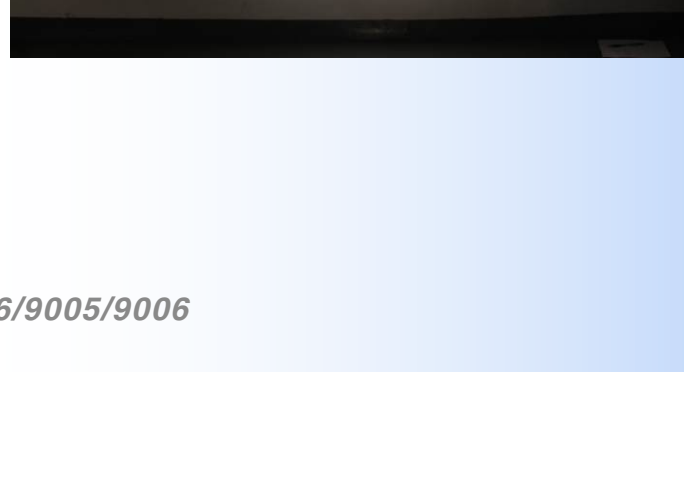

4500lux

9CS low beam

Halogen low beam

9CS high beam

Halogen high beam

Available models:  
Hi/Lo Beam: H4/H13/9004/9007  
Single Beam H11/H3/H7/H8/H9/H10/H11/H16/9005/9006
